All **Play** volumes are manufactured in 18mm multilayer birch wood and assembled with D4 water resistant vinylic glue. Each screw slot is reinforced with zinc-coated iron bushes, in order to fix the volumes to the wall and to avoid damaging the structure.

The cladding grip is composed of layer of two-component polyurethane paint and quartz with thin grain. An additional layer totally covers the supporting surface that will be in contact with the wall.

You can also request surfaces without grains and customize shapes and colors.

Installing :

Wood screws 4 mm diameter, from 5 to 7 cm long.

WARNING : Use all the fixing holes

Maintenance :

You can wash the surface with pressure washer.

Avoid corrosive products such as acids and iron brushes.

Cladding and colors :

Infinty grip (INF)

One-texture classic.

Dual Texture (DT)

Texture and smooth finished wood.

Dual Texture COLOR (DTC)

Texture and lacquering in bright colours.

Colors available: the 10 colors below plus customized colors on request.
